PennyPal — Speaker Cheat Sheet: Words & Short Sentences

> **How to use this guide:**
>
> - **Don't memorize long paragraphs.**
> - Look at the 🔑 **Essential Words** to get the right word in your head.
> - Speak the 🗣️ **Small Sentences** (only 5 to 8 words each).
> - Follow the 👉 **Action** with your hands on screen.

🧭 Handy Bridge Words (To Switch Screens Smoothly)

When you finish one screen and want to move to the next screen, use any of these simple words:

Word / Phrase	When to use it	Example
"Now, let's look at..."	Moving to a new screen	*"Now, let's look at the budget screen."*
"Next, watch this..."	Showing an interesting action	*"Next, watch this: I turn on Airplane Mode."*
"Right here, you can see..."	Pointing with your mouse	*"Right here, you can see three cards."*
"For example..."	Explaining a real situation	*"For example, buying lunch at campus."*
"And what's really good is..."	Highlighting a great feature	*"And what's really good is it works offline."*
"Basically..."	Explaining in simple words	*"Basically, it stops students from overspending."*

🆘 Rescue Words (If Your Mind Goes Blank)

If you freeze or forget a word, **do not worry or panic**. Take a breath and use these safe phrases:

- *"Let me show you this on screen."* (Buys you 3 seconds while you tap).
- *"In simple words..."* (Lets you reset your sentence).
- *"What this means is..."* (Helps you explain simply).
- *"My teammate worked on this part, so he can explain details."* (Passes to teammate).

Section 1: Team & Project Introduction

🔑 Essential Words

- **Lead** *(in charge of the team)*
- **Team Beast** *(our team name)*
- **Multi-Platform** *(works on mobile, tablet, and web)*

- **UI Design** *(how screens look)*
- **Admin Panel** *(website for manager)*
- **Documentation** *(project report)*
- **Motto** *(slogan / goal)*

🗣️ Small Sentences to Speak

- *"Good morning, respected judges."*
- *"My name is Muhammad Ammad Anees."*
- *"I am the team lead of Team TechBeast."*
- *"We are from Aptech North Nazimabad Center."*
- *"Let me introduce my team members:"*
- *"Muhammad Hadi worked on UI design."*
- *"Muhammad Sharjeel built the admin panel."*
- *"Abdul Qadir handled the documentation."*
- *"Our app is called PennyPal."*
- *"Our motto is: Make Every Penny Count."*

Section 2: Why We Built PennyPal (The Problem)

🔑 Essential Words

- **Pocket money** *(money from parents)*
- **Freelancing** *(part-time work)*
- **Allowance** *(monthly money)*
- **Expenses** *(money you spend)*
- **Track** *(keep record of)*
- **Overspending** *(spending too much)*
- **No signal / Offline** *(no internet in campus)*

🗣️ Small Sentences to Speak

- *"We had three project choices in TechWiz."*
- *"We chose PennyPal immediately."*
- *"Why? Because students face this every day."*
- *"Students get money from parents or freelancing."*
- *"Daily spending is hard to remember."*
- *"By month end, money is gone."*
- *"Campus classrooms often have no Wi-Fi."*
- *"So students need an app that works offline."*
- *"PennyPal solves this exact problem."*

Section 3: Technology Stack

🔑 Essential Words

- **Flutter** *(single codebase for all devices)*

- **Riverpod** *(manages app state / data)*
- **Firestore** *(Firebase cloud database)*
- **Cloudinary** *(stores receipt photos in cloud)*
- **Brevo** *(sends email alerts and reset links)*
- **Cache** *(saves data on phone memory)*
- **Gemini AI** *(scans paper bills)*

🗣️ Small Sentences to Speak

- *"We built PennyPal using Flutter."*
- *"It runs smoothly on mobile, tablet, and web."*
- *"We use Riverpod for state management."*
- *"It makes data updates fast and safe."*
- *"Our database is Cloud Firestore."*
- *"It saves data locally when offline."*
- *"Cloudinary securely hosts receipt images."*
- *"Brevo sends email alerts and verification links."*
- *"And Google Gemini AI scans receipts automatically."*

Section 4: Welcome & Onboarding Screen

🔑 Essential Words

- **First launch** *(opening app for first time)*
- **Welcome flow** *(friendly introduction)*
- **Swipeable cards** *(slides with pictures)*
- **4 Core Pillars** *(tracking, budgets, goals, lessons)*
- **Create account** *(register new student)*
- **Have account** *(go to login)*

👉 Action: Swipe through the onboarding slides, then tap "I already have an account" or "Skip".

🗣️ Small Sentences to Speak

- *"When a student opens PennyPal first time..."*
- *"They see this clean onboarding screen."*
- *"It introduces our four main pillars:"*
- *"One: tracking income and expenses."*
- *"Two: staying within monthly budgets."*
- *"Three: saving for future goals."*
- *"Four: learning practical financial habits."*
- *"A new student can tap Create Account."*
- *"Or tap 'I already have an account' to sign in."*

Section 5: Login & Authentication

🔑 Essential Words

- **Sign in** *(log in)*
- **Credentials** *(email and password)*
- **Secure** *(safe)*
- **Remember me** *(stays logged in)*

👉 Action: Tap email field, enter password, tap Sign In.

🗣️ Small Sentences to Speak

- *"Now we are at the login screen."*
- *"Student accounts are protected by Firebase Auth."*
- *"I enter our demo email and password."*
- *"Now I tap Sign In."*
- *"It verifies securely in seconds."*
- *"And opens the dashboard directly."*

Section 6: Student Dashboard

🔑 Essential Words

- **Net Balance** *(money you have left)*
- **Income** *(money coming in)*
- **Expense** *(money going out)*
- **Payment Modes** *(cash, bank card, mobile wallet)*
- **Budget Ring** *(circular progress circle)*
- **Green** *(safe / under budget)*
- **Amber** *(warning / 80% reached)*
- **Red / Coral** *(danger / over budget)*
- **Health Score** *(rating from 0 to 100)*
- **Cash Runway** *(days left until money finishes)*

👉 Action: Point to profile avatar & bell at top header, then Net Balance hero, cards, and pace ring.

🗣️ Small Sentences to Speak

- *"Right here is the main dashboard."*
- *"At the top header: profile picture, greeting, and notification bell."*
- *"Directly below is our financial command center."*
- *"Net Balance hero, Total Income, and Total Expense."*
- *"This balance combines all payment types:"*
- *"Cash in pocket, bank cards, and Nayapay."*
- *"In the center is our Budget Pace Ring."*
- *"It shows how much budget you used."*
- *"Green means spending is safe."*
- *"Amber is a warning at eighty percent."*

- *"Red means you went over budget."*
- *"Below is the Financial Health Score."*
- *"It rates your financial habits from 0 to 100."*
- *"Next to it is Cash Runway Days."*
- *"It tells you how many days cash will last."*

Section 6: Monthly Budgeting

🔑 Essential Words

- **Limit / Cap** *(maximum spending allowed)*
- **Calendar month** *(October, November, etc.)*
- **Categories** *(Food, Transport, Rent, Books)*
- **1-Tap Copy** *(clone last month's budget)*
- **Prevent** *(stop overspending before it happens)*

👉 Action: Tap Budget tab. Show 1-Tap Copy button.

🗣️ Small Sentences to Speak

- *"Now, let's open the Budget screen."*
- *"Budgets run by calendar month."*
- *"Students set spending limits for each category."*
- *"For example: 50 dollars for Food."*
- *"Look at this button: Copy Previous Month."*
- *"With one single tap, last month's budget copies over."*
- *"No repetitive typing every month."*

Section 7: Adding an Expense

🔑 Essential Words

- **Log** *(record)*
- **Amount** *(number / price)*
- **Category** *(what kind of expense)*
- **Wallet / Mode** *(paid by cash or card)*
- **Notes** *(short description)*

👉 Action: Tap the (+) button, select Food, enter $15, tap Save.

🗣️ Small Sentences to Speak

- *"Now, let's add a quick expense."*
- *"I tap the plus button."*
- *"I select the Food category."*
- *"I enter fifteen dollars."*
- *"I pick Cash as payment mode."*
- *"I tap Save."*

- *"The dashboard updates immediately."*

Section 8: Google Gemini AI Receipt Scanner

🔑 Essential Words

- **Scan** *(take picture)*
- **Receipt / Bill** *(paper slip from store)*
- **Extract** *(read and pull text)*
- **Merchant** *(store / shop name)*
- **Auto-fill** *(fills inputs automatically)*

👉 Action: Tap Camera / Scan button on add expense screen.

🗣️ Small Sentences to Speak

- *"Students can also scan paper bills."*
- *"I tap the Scan Receipt button."*
- *"Google Gemini Vision AI reads the photo."*
- *"It extracts store name, date, and amount."*
- *"It fills the form automatically."*
- *"The student just confirms and saves."*

Section 9: Offline Mode (Airplane Mode Demo)

🔑 Essential Words

- **Airplane Mode** *(disconnect internet)*
- **Offline** *(no Wi-Fi / no data)*
- **Local Storage** *(phone internal memory)*
- **Immediate / Instant** *(no loading wait)*
- **Sync** *(upload to cloud when online)*

👉 Action: Turn ON Airplane Mode -> Add $10 expense -> Turn OFF Airplane Mode.

🗣️ Small Sentences to Speak

- *"Now watch this important demo."*
- *"What if there is no internet in campus?"*
- *"I turn ON Airplane Mode now."*
- *"Notice: we are completely offline."*
- *"Let's add another ten dollar expense."*
- *"I tap Save."*
- *"Look: it saves instantly."*
- *"No lag, no loading spinner."*
- *"Now, I turn OFF Airplane Mode."*
- *"Internet is back."*
- *"Firebase automatically syncs the data to cloud."*

- *"Students never lose their records."*

Section 10: Savings Goals

🔑 Essential Words

- **Target** *(goal amount)*
- **Deadline** *(target date)*
- **Contribute** *(put money into savings)*
- **Progress bar** *(percentage saved)*
- **Milestone** *(reaching 25%, 50%, 100%)*

👉 Action: Tap Savings tab -> Show goal -> Tap Contribute $20.

🗣️ Small Sentences to Speak

- *"Next, let's open Savings Goals."*
- *"Students can save for specific things."*
- *"Like a laptop, exam fee, or emergency cash."*
- *"Let's tap Contribute and add twenty dollars."*
- *"The progress bar fills up."*
- *"It calculates how many months are left."*
- *"When you reach 100%, it celebrates and archives."*

Section 11: Extra Features (Split Bill, Borrow & Lend, Subscriptions)

🔑 Essential Words

- **Split Bill** *(divide restaurant bill with friends)*
- **Share** *(each person's part)*
- **WhatsApp Share** *(send reminder message)*
- **Borrow & Lend** *(informal student loans)*
- **Owe** *(money you have to return)*
- **Subscriptions** *(recurring monthly apps like Spotify)*

👉 Action: Open Split Bill, then show Borrow & Lend.

🗣️ Small Sentences to Speak

- *"We also added three unique student tools:"*
- *"First: Split Bill."*
- *"When friends eat together, it calculates each share."*
- *"You can copy payment details straight to WhatsApp."*
- *"Second: Borrow and Lend."*
- *"Students often lend small money to friends."*
- *"This tracks who owes you and what you owe."*
- *"Third: Subscriptions Tracker."*
- *"It tracks monthly apps like Spotify or gym memberships."*

- *"It alerts you before renewal date."*

Section 12: Learning Hub & AI Chatbot

🔑 Essential Words

- **Bite-sized** *(short 2-minute reading)*
- **Lessons** *(education topics)*
- **Needs vs Wants** *(important vs luxury spend)*
- **AI Assistant** *(financial helper bot)*

👉 Action: Tap Learning Hub, then tap Assistant.

🗣️ Small Sentences to Speak

- *"PennyPal also teaches financial literacy."*
- *"Our Learning Hub has bite-sized student lessons."*
- *"Like emergency funds and needs versus wants."*
- *"Students can also ask our AI Assistant for advice."*
- *"It gives personalized tips on how to save money."*

Section 13: Admin Panel

🔑 Essential Words

- **Admin** *(manager / teacher)*
- **Monitor** *(check student activity)*
- **Analytics** *(charts and statistics)*
- **CMS** *(Content Management System — add lessons)*
- **Support Tickets** *(help requests)*

👉 Action: Switch to admin view or mention login credentials.

🗣️ Small Sentences to Speak

- *"PennyPal also includes an Administrator Panel."*
- *"The administrator can see registered student stats."*
- *"They can answer student support tickets."*
- *"And publish new learning lessons through the CMS."*

Section 14: Closing Statement

🗣️ Small Sentences to Speak

- *"To conclude:"*
- *"We built PennyPal strictly following the TECHWIZ SRS."*
- *"It is an offline-first companion tailored for students."*

- *"We are very proud of what we built."*
- *"Thank you very much, respected judges."*
- *"We are ready for your questions!"*

Section 15: Quick 1-Line Answers for Judge Questions

If a judge asks a question, **don't give a long speech**. Give one or two short sentences:

Question	🗣️ What to say (Short & Simple)
Q1. Why Riverpod instead of Provider?	*"Riverpod is safe at compile time. It never crashes with ProviderNotFound."*
Q2. How does offline mode work?	*"Firestore stores data on the phone first. When internet returns, it syncs to cloud."*
Q3. Why allow only 2 cards?	*"To keep things simple and stop students from overspending on multiple cards."*
Q4. What if Gemini API fails?	*"We have a local backup engine that reads receipt text without internet."*
Q5. How is user data secure?	*"Each user has their own Firebase folder. No student can see another student's data."*
Q6. What happens if month ends?	*"All-time balance carries forward. Monthly expenses reset to zero for the new month."*
Q7. How did you test the app?	*"We wrote 73 automated tests for all math formulas and tested manual offline mode."*
Q8. What if user spends more than budget?	*"The ring turns red, health score drops, and the app alerts the student immediately."*
Q9. Can it work on web and desktop?	*"Yes, Flutter builds for mobile, web, and desktop from this one codebase."*
Q10. What is your future plan?	*"We want to connect university meal cards and add local bank notifications."*

Section 16: 1-Line Tech Stack Cheatsheet (Tools & Technologies Used)

If judges ask: *"What tools did you use and why?"*, use these simple 1-line answers:

- **Flutter:** *"Builds our app for mobile, tablet, and web from a single codebase."*
- **Firebase Auth:** *"Manages secure student login, signups, and password resets."*
- **Cloud Firestore:** *"Our cloud database that automatically caches data for offline use."*
- **Cloudinary:** *"Stores and optimizes paper receipt photos and profile pictures in the cloud."*
- **Brevo (Sendinblue):** *"Sends automated email verification links and budget alerts."*
- **Google Gemini AI:** *"Scans receipts to extract amounts and answers budgeting questions."*
- **Riverpod 2.0:** *"Manages app data reactively without unnecessary screen rebuilds."*

- **GoRouter:** "*Protects application routes and separates student screens from the admin panel.*"
- **SharedPreferences:** "*Saves user settings like dark mode and default currency on the phone.*"
- **Flutter Local Notifications:** "*Triggers instant phone notifications when spending reaches 80% or 100% of budget.*"
- **Pdf & Printing Package:** "*Generates and prints formatted monthly student spending reports.*"
- **GitHub:** "*Used by our team for version control, code branches, and collaboration.*"
